Documents | Cataloging | Indexing Solutions

Just "CLICK" TO share, track, store, manage and retrieve your documents.

With our DMS, we want to save alot of your time resources wasted by employees looking just for that one file or document from piles of paperwork. For this reason, WacLOUD has you covered with our document management solutions because this is key to the success of almost every kind of business or Institution. DMS does alot from processing,tracking, managing, storing and retrieving documents. As WacLOUD we exist to help you avoid the irreparable damage an Institution would face due to having a failed document management system.

WACLOUD is a prominent enterprise software company in Uganda, offering flexible and scalable enterprise Digital Processes and Web solutions. We give you the right blend of expertise and aptitude to consolidate your Documents and Data Solutions.

The company was incorporated in October 2018, it is an IT firm that offers a range of services in web hosting, website development, Indexing, Cataloguing, Document Automisation, customised systems solutions and products and networking. We work with our clients to ensure that they yield multi-functional, user friendly and customised solutions to automate business operations and needs.

We're the solution to organisations that are looking for efficient and effective information, communication and technology services, to create a competitive advantage. We have transformed the information communication to be timely, up to-date, consistent, and cost-effective as well as fast and unlimited in order for companies to create and sustain their competitive advantage. Companies can therefore use our web solutions as a vehicle for cost-effective and boundary-less information exchange.

We have an experience of more than six years and have the expertise and corporate resources coupled with skilled personnel with versatile IT proficiencies in Open Source Content Management

systems including; Drupal, Joomla, WordPress and programming skills in C, Java, Python, .NET, as well as scripting in PHP, HTML, CSS, JavaScript XML among others.

Vision

Our Vision is to ensure that the client receives value and their expectations are exceeded as they relate to investment of time and money.

Mission

Our Mission is to scale up in business innovations and automation to become the leading cloud service provider in Uganda.

Core Values

- i. **Safety:** To prioritise website security which helps to scan backdoor hacks, redirect hacks, Trojans, and many other threats.
