User interface AutoCAD includes a command-line user interface (CLUI) for windowless use. Windowless mode enables the use of AutoCAD without activating a graphical interface and using the mouse. Once the program is

in windowless mode, users can design and view their projects. Commands, such as the commands to export drawings, can be used with the keyboard and mouse in windowless mode. The CLUI is designed to be simple, easy-to-use, and responsive. Drawing tools AutoCAD supports many different types of drawing tools. These include layers, blocks, linetypes, patterns, symbols, custom line types, brushes, text styles, pens, and multiple levels of opacity. Layers, blocks and symbols can also be edited in edit mode.
