examine the activity of L-glutamate as a neurotransmitter
in the nervous system of amphibians. The most active
period of studies will be during the initial three years of the
grant, and will focus on basic synaptic organization of the
olfactory nerve (cranial nerve I) synapses, and compare the
olfactory functions of different amphibians (toad, frog and
salamander). After the preliminary experiments are
completed, studies on the physiological and
pharmacological properties of olfactory neurotransmitters
will begin. In all of the experiments some knowledge of
olfactory anatomy and physiology is required. Q: What is
the best way to install M2Crypto on ubuntu? I want to
install M2Crypto on Ubuntu. When I searched Google, I
found out how to install it using virtualenv but I want to
know whether it is advisable to install it inside a virtualenv
or I should install it inside my home directory? And if I
need to install it inside a virtualenv, then which version of
virtualenv should I use? I found many versions, but I didn't
get any appropriate and useful one. I am a total newbie for
ubuntu and python. Please help me. A: You should install
m2crypto in ~/python-staging-env 3da54e8ca3
