Let's get started! Features: Convert selected pages to JPEG, JPEG2000, PDF, TIFF, GIF, PNG, PNG8 and PNG24. Apply custom watermarks. Set protection password. Raster Image Printer is a Windows application which uses the features of the Windows Print API to convert the selected pages to JPEG, JPEG2000, PDF, TIFF, GIF, PNG, PNG8 and PNG24. To convert the selected pages: - Select the pages from your printer or a folder. - Click on the button for the desired format (jpg, jpeg, jpepp, etc.). The selected pages will be sent to the 'convert' window. - Select your desired JPG, JPEG, JPEGPP or TIFF quality. - Click on the button to confirm the settings. - Then click on OK to send the selected pages to the destination folder. You can add a watermark to any JPG, JPEG, JPEGPP or TIFF file. When the watermark is enabled, it will be printed on all the selected pages. You can also set protection password, which will prevent the recipient from copying, printing or commenting the document. In the watermark window you can specify the name of the watermark file and its path. When the password is enabled, it will be copied to the clipboard during the opening of the file. You can also set protection password, which will prevent the recipient from copying, printing or commenting the document. If a password is enabled, a password prompt window will pop up upon opening the file (in the picture below). Please enter the password: In the screenshots below you can see a sample screen before and after the setting of a password for JPG, JPEG and JPEGPP documents. You can see the protection prompts for PDF and TIFF documents, which is not visible in these screenshots.
