edhird nkaqppjdcsvjdlkqpa . . . I
have another problem with all my
problem text not between the same

tags. Many thanks, A: You can use the following regex $(\backslash? \backslash G)[^\backslash]+\backslash K(?:[^\backslash r]+|)+>$ where $(\backslash? \backslash G)$ - Matches if the previous match was $\backslash G$ or "end of the previous match", i.e. it is the only thing between (and) $[^\backslash]+$ - Match 1 or more chars other than] and $\backslash r]+|]+>$ - Match 1 or more chars other than , or the beginning of line $\backslash r$ or (i.e. the non-terminal) and then the closing tag of line (not necessary part since it is matched by $\backslash K$) If you want to use

lookbehind, you may use (?<[^\r]+>\K(?:[^\r]+|>)) See regex demo
Or, to match if not the first occurrence is on the end of the string and at the same time not inside of a \G-anchored match: (?<[^\r]+>\K(?:[^\r]+|>))

The Concept of Forgiveness by Fred Luskin. Reprinted from the Spring 2010 issue of the Christian Internationalist Magazine, edited by Don Cawley and John Warner. .
