What's new:

Read more...tag:>Stupid thing is, it's not exactly clear why this game came into being. Is it some fly-by-night attempt to cash in on the battle-system seen in Diablo III, but fail to make monetary sense? There was some investigation into the design work that went into Mythender and its components, and it doesn't really come across as a thing to play. It's more like an RPG with a few decked-out Diablo features slapped on, but those features are disproportionately large and not so fun. Diablo players may find an easy sense of connection in the concept, but from my limited two-day gameplay, it feels like the result of someone's favorite weekend hack-and-slash featuring not only some neat characters and classes, but some slightly more interesting terrain. Perhaps it's some kind of quest to create more of whatever it is that inspired the pre-release interest, but it's certainly not on anyone's radar. It's something nobody would want to play with their friends for more than six hours or so in a day. Kotaku has some first impressions of the game. Some cool features, like the ability to swap from a Paladin perspective to a Sorcerer one during a fight, or getting insanely powerful weapons in its masterworks. So far the worst things I've seen in a game about swords and spells, it's just a buenos dias to look like a fun one-on-one. There's a dozen reasons why making a Diablo clone isn't smart, from the design problems to the the hard sell. If they're looking at it, I'd recommend they hire someone like Braid's Matt Uelmen, or look into the Half-Life 2 Source engine and learn how games are made. <
