This is not ok guys. why you don't add the option to buy 2 key for 1 credit or more. I don't care if i'm a f**king noob, or how much i'm going to spend. the key is in my house at the moment, i don't have other port/account on steam. This is not ok, because i'm can't make 2 keys with one credit, now i can buy 2 keys in this way: to open steam and click "add credit".At the time, FanGraphs came up with a stat that shows how well the advanced metrics were predicted. Anecdotally, it's not hard to see how well Justin Verlander might have performed this year. Starting on June 2, he was working through what would be a 20-start season, but would end up missing only three games due to inactivity and a strained oblique muscle that was kept active instead of resting, and would miss two starts due to a blister on his left hand that caused him to miss a scheduled start. A blister can be caused in several ways, and likely

contributed to his struggles early on. It's hard to say with certainty just what was going on, but it appears to have been more of a factor than simply the constant workload. The blisters may not have hurt his command or mechanics, as his walk rate from June 2 on was 3.
