Story About five years ago, the survivors of a zombie apocalypse, waiting for rescue, went on holiday to an island away from the civilization, knowing that the zombies could not easily reach. The vacation was short-lived, because, while on holiday, a large meteorite struck the island with a force so great that it damaged the spindle of the satellite dish. In a short time, the signal was destroyed, and after that the world was a horrifying place to be. The meteorite is believed to be the cause of the disturbance of the sea waves, destroying the reefs where the survivors were resting and diverting the fish in other directions. And this is exactly what happened. The fish were attracted by the decay of the reefs, and all that was left of them were skeletons. The victims of the tourist resort were united in an amazing conspiracy, trusting in the fact that the event would be recorded on the digital cameras that they left in the hotel. But, what they did not expect is that a satellite

detected the energy released by the meteorite and deduced that those people needed help. The salvation came in the form of a spaceship: the survivors reached the energy that was going to them, but, unfortunately, the spaceship also got infected by a virus. The survivors, having built what they could of the ship, left for the stars, in search of other survivors. After a long and difficult journey, they arrived in a distant galaxy. So, if it was a place full of boredom and loneliness, there were at least some survivors from there to meet. What they did not realize is that it was the wrong place. After weeks of traveling, the ship fell, and the survivors found themselves on a planet inhabited by zombies: you are one of those survivors. How to Play: You can play Washed Up in two different ways: When you start playing, you will have basic weapons. You will be able to choose one of the three robots available. If you choose the hedgehog, you will be able to use its ability to jump over zombies, and it will start with

If you pick the flying fox, it will start with a small robot that will be able to destroy the closest zombies, but they will be destroyed once they are left behind. If you choose the centurion, it will start with a machine gun that will be able to destroy five zombies at the same time. The main problem that you will

**will have a single-player story campaign in an hour of gameplay too. GAME DAYS 5, 6 and 7 (Thursday May 10, 11 and 12 2018) There will be a livestream every day featuring the developers of the game, including some games from previous events and a Q&A session on the day of the event. PLUS! a late music-only stream, new music and more competition, giveaways, and the return of the visualizers! A team-based virtual reality combat sport called Velocity VR Battle Royale is coming to Game Day events at the RARE Film and Media Conference - in partnership with web streaming site Twitch.tv. Who will come out of the beginning as the true victor at the end of the game, and how long will it take for the teams of 21 players to work out their strategy and know their enemies' strengths and weaknesses? GameDay 6, on the 11th of May, will include actual gunfire, as the organisers put their own money on the line in a first-person shooting machine - the Colt Sauer P226 - while 6 teams each use a 'guest' chopper - an Osprey Timberline Long Trip just 400 feet from the ground - to eliminate each other from the sky. And not just eliminate them but drink some beer in the process, too, thanks to a competition sponsored by Busch and Miller Lite. A different guest helicopter will be up the joint on the 12th - the Bell JetRanger - put up at the 360 theater - in honour of legendary director David Lynch - as the teams try to shoot the other teams while ambushing them, plus enjoy some local beer, while the feature competition prize goes to the player that scores the most headshots. The final, "silent" game day, GameDay 7, on the 12th, will find the teams led by expert shooters competing to bring down the opposition aircraft. Each team uses a Bell JetRanger as the flight platform, and their opponents use Nimrods. Everybody is armed with a variety of firearms, and grenades are the most effective way to survive in-game. Velocity VR Battle Royale, running virtual reality headsets, will be up in the Harrogate Arena's new interactive 360 Theater and provide a completely**

Amuro is joined by a young mechanic from his lab named Daigo who assists him in capturing the monster. But the Kaiju soon takes control of Daigo's body and Amuro must go on an adventure to the ocean depths of the world to free his friend.
