What's new:

- **Dynamic visuals** - Introducing two new player models, the more sophisticated Pro Player and the speedy Speedster model, in addition to enhancements to the game's elements, such as the revamped snow and weather effects, improved kicking and goalkeeping animations, and shin-high boots.
- **Dynamic behaviour** - Replacing the stale physics system, which made too many players too similar, the new game dynamics provide much more definition and emphasis to the character of the players. Players are noticeably more fluid and natural, engaged in a new combat system. This heightened level of dynamic behaviour makes FIFA 22 much more enjoyable.
- **All 22 players in all three positions** - an overhaul of all the central midfielders for Pro and Ultimate Team play gives you much more creative control than any previous game. All 22 of them!
- **Player ratings and attributes** - A significant increase in the number of player attributes has been introduced, giving more statistical control over individual players, making it easier than ever to dream up the most effective teams.
- **Improved off-the-ball actions** - Boost and dampen are key additions to the game's interactivity, allowing you to customise your team's pressing and passing.
- **Passion and emotion** - The game's all-new emotion system allows you to raise and lower the intensity of play in dynamic, and enjoyable ways. When things go well, emotions get real, when things go wrong, emotions fall.
- **Introduction of key moments** - Play a simple pass to ensure that a key moment is ignited. Pass continuously for a sustained juke, or carry the ball in a tight space for an unopposed goal. It's the only possible way to score a goal.
- **Dynamic ball physics** - Replacing the old, decidedly unresponsive "second law," the new physics system makes small give-and-go's at the highest level of play more realistic and responsive.
- **All 22 ages** - Rounding out the game's roster with all 22

players of all ages give players of all types, shapes, sizes and abilities a chance to play. From the absolute beginners, through to stars in decline and past-their-best, play as everyone. Ah, but not everyone in the world is equal, so all the players appear with unique attributes; plus,
