[Cra.rarQ: How to render json in Ember
after an AJAX request? I have an Ember
application using ember-data, with the
following controller/route

```
App.InboxController =  
Ember.ArrayController.extend({ model:  
  function() { var ajaxReturn =  
    Ember.AJAX.fetch( " "); return  
    ajaxReturn.then(function(data) {  
      console.log('done'); return data; },  
      function(data) { console.log('failed');  
        return data; }); }, actions: { action1:  
  function() { alert('action1'); } } });  
The endpoint returns the following output [{"id":1,"username":"sky","contact_number":  
1234567890}, {"id":2,"username":"sky","
```

contact_number":1234567890}] Now, how do I get my view to render the output of this model? It does not work as expected. I have changed the controller to App.InboxController = Ember.ArrayController.extend({ model: function() { var ajaxReturn = Ember.AJAX.fetch(" "); return ajaxReturn.then(function(data) { console.log('done'); return data; }, function(data) { console.log('failed');
