

9Locker With Full Keygen

[Download](#)

Create a custom lock pattern for your desktop. To start using the application, simply install it on your desktop and launch it. 9Locker sports a clean and intuitive layout that allows you to configure the dedicated parameters with minimum effort. Create a custom lock pattern for your desktop, To set up the lock screen, just select it from the list of displayed tools, which appear right after the program is launched. Incredible! 9Locker is a small but powerful application that allows you to customize your desktop locking system. The program is supposed to help you create a custom locking pattern that will be used by your system for locking the desktop. Initially, you will be able to draw the line pattern for your lock screen. But, if you want to use more advanced parameters, then you will be able to add and remove custom items on the drawing board. As soon as the setup is complete, it is possible to choose the access permission settings for the desktop. To execute the lock screen, simply draw the lock pattern on your desktop and press the LOCK key. And the desktop will be secured! You can use your touch screen or mouse. As it was mentioned, the application sports a clean and intuitive layout that allows you to easily adjust the parameters. The entire process is done in a short amount of time. As a result, it does not require much computer knowledge, so even newbies can set it up easily. The program doesn't disturb other applications. It remains light on system resources and does not interfere with other programs' functionality. During our testing, we have noticed that 9Locker carries out the entire process quickly. As it would be expected from such a small utility, it remains light on system resources, so it does not burden the overall performance of the computer, nor interfere with other programs' functionality. In terms of configuration settings, you can configure the application to show a notification sound when the system is locked. Additionally, you can also specify the number of retries and disable remote access operations. If you liked our review, then don't forget to rate it. And if you want to get the best results, then it is best to download the latest version of 9Locker. 9Locker is a small but powerful application that allows you to customize your desktop locking system. The program is supposed to help you create a custom locking pattern that will be used by your system for locking the desktop.

What's New in the 9Locker?

9Locker is a lightweight software application whose purpose is to help you lock your screen using a simple pattern tracing action. Create a custom lock pattern for your desktop You can use this tool via your mouse or touchscreen. Plus, it is important to mention that it offers support for multiple monitors. 9Locker sports a clean and intuitive layout that allows you to configure the dedicated parameters with minimum effort. The program gives you the possibility to draw the pattern twice and set up passwords for being able to access your desktop in case you have forgotten the custom pattern. Customize the way your new lock screen feels What's more, you are allowed to change the background of your lock screen by uploading an image from the computer (JPG, PNG, or BMP file format) or selecting a color. Additionally, you can choose the picture position, such as stretch, center, tile, or zoom mode. When it comes to configuration settings, you are allowed to hide the pattern line, run the utility at Windows startup, play sound notifications when the logon process fails, send email messages, specify the number of retries, as well as disable remote access operations. Since it doesn't require much computer knowledge to set up the dedicated parameters, even rookies can master the entire process with minimum effort. During our testing we have noticed that 9Locker carries out a task quickly. As it would be expected from such a small utility, it remains light on system resources, so it doesn't burden the overall performance of the computer, nor interfere with other programs' functionality. A few last words 9Locker offers a handy set of parameters for helping you restrict other users access to your desktop.
