It took me just a little bit of over two years to make the switch, but that was plenty of time to test things out and figure out what I liked and didn't like. That said, I still use Lightroom and Adobe Creative Suite for editing 1, 2 and 3 at least once a week, but for that I would use Adobe Photoshop for my heavy lifting, and Photoshop Elements for the rest. Through those years, Adobe has basically twisted their disruptive thumbs into me, each time with something new that is getting better and better. This is one of the first pieces of software I've used that offered (in my opinion) a seamless experience for beginners and other pros.
