Description Made my first movie for the iPhone and it turned out pretty good. Its very easy to use and does it all for you, so it saves a lot of time. It is very fast and fast to get results. CSMD is a software based on a unique concept to work as an audio virtual mixers. This concept is very simple but is in fact, very unique and can be used in other similar projects. The software has been built on the high concept of Visual Studio and Windows Forms. Basically we have compiled in Visual Studio a library of components, some of them are, Form, Diagram, Lines, Input, Graph, and Output, The Form holds all the widgets for each component. Then we have generated a library of components with a wizard on the Form view. This library of components, is then linked to the main Form, then we run the application, and you will see all the widgets running on a grid. When you use the software, you can create music by selecting and moving all the input and output components with the mouse, you can use keyboard to play and record. The software will calculate all the keys, synths, samples, etc... Description Made my first movie for the iPhone and it turned out pretty good.
