I've just used Lightroom 3.4.5 and wanted to upgrade to 5.2. I downloaded the trial version 5.2 and installed it but it just crashed after 3 days (I'm using Windows 7). Are you sure you didn't do any wrong (compared to old version)? No big problem could be fixed, but if you have no idea, you could give it a try. I can't wait for the full version in order to make use of it! Well, Lightroom is not that slow, even with some of the issues I stated. Performance is pretty good for what it is. My real complaint is that LR5 cannot import a batch of images without freezing up. I've noticed this problem on the Lightroom forums, too. If it's fixed in LR6, I'll do a full review of the new version. Adobe, please fix LR5. I'm learning that you have to have patience to pare down images to size. Throwing away the original image seems like a good idea, but then I'd still want to view the original. That's why I'm just learning to work with LR6. Right now I still use the original raw files. Hi. Thanks for the review! My biggest gripe I don't see addressed is the fact that it still exists in Lightroom 5.3 that when reviewing images, you must first select a specific camera. This does not apply to Library mode, only to meeting any of the review's criteria.
Perhaps this is something that could be of relevance to future lightroom releases or maybe even tip the scale regarding the general value of lightroom as a tool.
Make sense? Thanks for your time and knowledge!

This can be slightly overwhelming because there are a few different Creative Cloud plans to pick from according to what your area of interest is. To make things simple there are 3 different options that you will have to choose from that include Photoshop. First the 'Photography' plan which is $9.99/mo and grants you access to Adobe Photoshop and also Adobe Lightroom which is a program that allows for detailed photo editing. This is a great value considering the second option is

$20.99/mo for use of only Photoshop. The third and final option which I think is the best option is the Student and Teacher plan that is $19.99/mo and includes access to every Adobe program available. This is an amazing value because you get access to everything Adobe has to offer. From there you can learn and try new programs that Adobe offers to see what your favorite is. If you would like to save 60% on an Adobe Creative Cloud plan then you can click the link here to sign up. The bottom line is that there is no single best Adobe Photoshop for beginners – it all depends on your individual needs and skill level. However, all of the options mentioned above are great choices for those just starting out with this powerful software.
