Serial..Email:biomn1@gmail.comTelephone:+2349010970000Website: Bend (Missouri) Foothills Bend is a fold in the Gasconade River where the river bends in between Headrick Creek and Southern Creek. The bend in the Gasconade River happens at the time of spring flooding as the river increases in volume and water rises over the levee to lower the level of the Gasconade. This is due to a large reservoir called the Three Creeks Reservoir, which takes up a large part of the Gasconade River valley. The reservoir can hold up to of water. Foothills Bend is almost completely inundated by water during spring flooding and the terrain is mostly marsh. References Category:Geography of Callaway County, MissouriThe present invention relates to a process for the recovery of base metals from sulphur containing ores, in particular, to a process for the recovery of copper, zinc, lead and gold from copper sulphides containing ores in a single stage solvent extraction process using both aqueous and organic extractants. The term "solvent extraction" is used herein to denote a variety of processes, such as aqueous liquid phase leaching of sulphidic ores to recover base metals such as copper, zinc, lead and gold, or to separate silver from base metals. In the existing processes
